Don't just convert documents
—transform them

THE SPEED, QUALITY AND FEATURES TO SAVE VALUABLE TIME, REDUCE COSTS, INCREASE PRODUCTIVITY, AND GET THE MOST OUT OF YOUR SCANNING DEVICES

The continued use of paper slows organizations down and frequently leads to “knowledge re-creation.” Not only does this waste time—as you are forced to re-create information from existing paper or search for misplaced documents—but it is also a drain on overall productivity and profitability.

Additionally, small businesses and individuals underutilize millions of scanning devices that could save valuable time and effort. Finally, PDF documents—the digital version of paper—are prolific and can be difficult to edit or repurpose.

The question remains: “How can you get the document into the format you want without having to do extensive re-typing or re-editing?”

The answer is Kofax OmniPage Ultimate. Convert paper, PDF files and forms into documents you can automatically send to others, edit on your PC or archive in a document repository. Amazing accuracy, support for virtually any scanner, the best tools to customize your process, and automatic document routing make it the perfect choice to maximize productivity.
